# ABLOY® EL520, EL522

# High security DIN standard motor lock for wooden and metal doors

## Product description

High security locks EL520/522 are used in environments where convenience, higher security, high durability or door automation is needed. The integrated monitoring contacts from the lock can be connected to the different systems.

Deadbolt is withdrawn inside the lockcase by motor and double action latch is released. when electrical control is on. Door is opened from outside by using door pull. Also possible to connect with door automatics for full hands-free operation.

Inside handle opens lock mechanically (exit function), no need for electric control.

When door closes, dead bolt is thrown out automatically, double action latch is blocked and the lock case is secured in two points.

- Overview of Advantages
